

# **Instructions**

## **Form E20 - Annual Process Fuel Use**

Please provide complete information in all the blanks. If an item is not applicable, mark NA. Accuracy is important.

### **General Information:**

Enter the Plant ID number, emission year, company name, location, emission unit, emission points included and process description.

Identify the person completing this form.

### **Process Fuel Consumption:**

List and identify the fuel used in process operations by month and by annual total. Please note the units (gallons, pounds, tons, etc.)

For coal, specify the type of feeder in the "Type" box (Pulverizer, Spreader/Stoker or Other) and provide the heat content, percent ash (%A) and the percent sulfur (%S) on an annual average basis.

For coke, provide the percent sulfur (%S) on an annual average basis.

For fuel oil, specify the grade of oil and provide the heat content and the percent sulfur (%S) on an annual average basis.

For wood or wood waste, provide the heat content and the percent ash (%A) on an annual average basis.

For other fuel, provide the heat content and the percent sulfur (%S) on an annual

Specify the units for any fuels listed under OTHER.

Fill out separate E20 Forms if there are process operations with different control efficiencies or if there are process operations which use different emission factors to calculate the emissions, if this information is available.

If the process uses more than one type of fuel oil or more than one "other" fuel, please fill out another copy of Form E20 for each additional fuel type.

The "Page Identifier" box at the very bottom is a place where you can enter your own identifier for this copy of this form among other pages in your emissions inventory submittal.
